Institute for Advanced Study

IVth SUMMER SCHOOL IN ECONOMIC MODELLING, ANALYSING AND FORECASTING

Pavia, 7-22 July 2008

The course is organized in three parts and aims to: provide participants with the tools for analyzing the effects and implications of trade policies; introduce them to modern time series analysis; teach them how to build a CGE models based on real world figures. Most of the following issues will be treated both from a theoretical perspective and through the help of computer simulations.

- I. Effects and implications of trade policies
(7th-9th July)
- II. Time series econometrics
(10th-16th July)
- III. Computable general equilibrium modelling
(16th-22nd July)

ORGANIZATION

The course is organized by the Institute of Advanced Study of Pavia – Cooperation and Development School – in collaboration with the ***Department of Political Economy and Quantitative Methods*** and the ***Department of Public Economics*** of the University of Pavia.

The initiative is part of a wider collaboration promoted in the realm of research and higher education with the Palestinian Central Bureau of Statistics (PCBS), and the Palestinian Monetary Authority. The first part of the course will be attended by selected members of the Eastern and Southern Africa Management Institute (ESAMI), as part of a wider initiative of institutional trade capacity-building of ACP countries aimed at by the Trade.Com partners: CICOPS of the University of Pavia, ECDPM and University of Maastricht, London School of Economics, and the Amsterdam Law School.

Classes will be held at the University of Pavia, Faculty of Economics, Via San Felice 5 – 27100 Pavia, IT.
