

This workshop is organized as a part of the planned activities of the European project entitled: ‘Increasing the capacities of local administrators and officials in defining policies consistent with the Sustainable Human Development approach’. It is coordinated by the Comune di Arezzo in partnership with Provincia di Arezzo; Regione Toscana; Ucodep; Lunaria; ARCO Centro Pin, Università di Firenze; HDCP-IRC, IUSS Pavia. The primary objective of the project consists in providing Italian Local Authorities with the methodological tools to promote and implement local development and decentralized cooperation policies that are consistent with the sustainable human development approach - as proposed by the Human Development Reports published yearly since 1990 by the UNDP.

The aim of this workshop is to discuss and point out the relationship existing between the education and the human development in reference to different aspects of a society’s life and functioning, with a focus on the vulnerable youth. In particular, the workshop will take in examination the following relations: *education and capability*; *education and disability*; *education and migration*. The discussion of each topic will be conducted by international and Italian scholars and representatives of institutions and non-governmental organizations. The workshop will be concluded by a final roundtable on “*Education, Cooperation and Human Development: twenty years later*”.

EU Project cod. DCI-NSA ED/2008/153-824
