This workshop is organized as a part of the planned activities of the European project entitled: ‘Increasing the capacities of local administrators and officials in defining policies consistent with the Sustainable Human Development approach’. It is coordinated by the Comune di Arezzo in partnership with Provincia di Arezzo; Regione Toscana; Oxfam Italia; Lunaria; ARCO Centro Pin, Università di Firenze; HDCP-IRC, IUSS Pavia. The primary objective of the project consists in providing Italian Local Authorities with the methodological tools to promote and implement local development and decentralized cooperation policies that are consistent with the sustainable human development approach - as proposed by the Human Development Reports published yearly since 1990 by the UNDP.

The aim of the workshop is to investigate the link between economic, social, and environmental sustainability. This is also the main theme of the incoming Human Development Report, that will be discussed by a representative of Human Development Report Office. The debate will also address new tools and alternative ways of political participation and focus on policy recommendations at the international, national and local level. The last part of the workshop will be devoted to corporate social responsibility issues, towards more ethical and sustainable behaviors.
