A TALE OF UNPRECEDENTED SOCIO-ENVIRONMENTAL EXTREME EVENTS

SPEAKER

Prof. Gabriele MESSORI, Università di Uppsala (Svezia)

The world is seeing increases in the frequency or intensity of a range of environmental extreme events. Furthermore, it is often those who are already vulnerable that experience the biggest impacts from these extremes. How will our society interact with and respond to future unprecedented extreme events? I will try to answer this question by combining social science theories describing how different societal groups are affected by, and recover from, extreme events with numerical projections of unprecedented extreme events and local analyses of past extremes. An application to the case of extreme droughts in Southern Africa illustrates how we can use this perspective to build storylines of unprecedented socio-environmental extremes.

FREE ENTRY ACCORDING TO CURRENT COVID-19 REGULATIONS.

REGISTRATION REQUIRED.

TO PARTICIPATE IN PRESENCE SEND AN EMAIL TO TERZAMMISSIONE@IUSSPAVIA.IT BY JUNE, 3rd 2022.
