

IUSS

Scuola Universitaria Superiore Pavia

Declaration of generative AI use in the preparation of Research Projects

IUSS acknowledges the potential of generative AI and AI-assisted technologies, when used responsibly, to help candidates work efficiently, gain critical insights fast and achieve better outcomes.

Candidates preparing a project for application to the School's PhD Programs can use AI Tools to support them. However, these tools must never be used as a substitute for human critical thinking, expertise and evaluation. AI technology should always be applied with human oversight and control.

Candidates must declare the use of generative AI in the project preparation process.

Ultimately, candidates are responsible and accountable for the contents of their work.

All projects who have been prepared with the help of AI Tools will have to feature the following declaration, adequately modified:

Statement: During the preparation of this research project the candidate used [NAME OF TOOL / SERVICE] in order to [REASON]. After using this tool/service, the candidate reviewed and edited the content as needed and take(s) full responsibility for the content.
